

EDUCATIONAL SUCCESS TASK FORCE

Subgroup 2 - Effective Interventions & Best Practices in Basic Skills Education for P-20

- Identify research-based strategies and best practices around developmental education and remedial education that will ensure students are postsecondary and workforce ready and will increase the likelihood that they will complete postsecondary education efficiently.
- Review data and research on effective interventions at the elementary and secondary levels and the postsecondary level to keep kids on a path for high school and college graduation. Make this information available to school districts, schools, and institutions of higher education. Best practices may include curriculum, methods of delivering the intervention/courses, diagnostic placement practices, use of modularized/shorter term courses, tutoring, online, etc.
- Review all state statutes, state board rules, and guidelines adopted by the Commission to assist school districts and schools in providing developmental education to help ensure students demonstrate postsecondary and workforce readiness no later than high school and to assist institutions of higher education in providing remedial education.

Samantha Long, co-chair, Colorado Legacy Foundation
Jane Szucs, co-chair, Colorado Mountain College
